

BioGold™

Prevents mortality due to intestinal disorder's

Biogold™ is a blend of microbial cell formulation, when administered at sufficient dosages exhibit beneficial effects on the health of the pet fish.

The mechanism involved by Biogold bacteria eliminates pathogens by competitive exclusion, contribute nutrients, enzyme for digestion which relates to good health, growth and reduced mortality.

Biogold™ :

- Establishes beneficial microflora in the intestine
- Controls development of pathogenic bacteria in the intestine
- Reduces intentional P^H in pet fish
- Enhances digestion and ensures better absorption of nutrients in the intestine
- Ensures good health and growth
- Prevents mortality of pet fish

Composition per 5 gm

<i>Streptococcus faecalis</i> T-110	}	100 mg (3.5x10 ⁹)
<i>Streptococcus faecium</i> T-120		
<i>Bacillus mesentericus</i> TO-A	}	100 mg (1.5x10 ⁷)
<i>Bacillus subtilis</i> TO-A		
<i>Bacillus natto</i> TO-A		
<i>Clostridium butyricum</i> TO-A		100 mg (1x10 ⁷)
<i>Saccharomyces cerevisiae</i>		2.1 gm
Alkaline protease		50 mg (500,000 units)
Lipase		50 mg (20,000 units)
Excipients		Q.S

Biogold is blend of beneficial bacteria used in aquaculture as animal feed supplement.

Direction for use :

(To be calculated as per quantity of water in the aquaria)

- 5 gms per 5 liters of tank water is to be dissolved in the aquarium water
- Repeat the usage once in 4 days to keep the pet fish healthy
- Stop filters for one hour after the application of Biogold

Physical features

Appearance - Free flowing powder with fermented odour

Tolerance

Temperature range: Min 10 - Max 60°C

pH range : Min 4 - Max 10

Storage Precautions

Keep the bottle tightly closed during usage

Store in a dry place under 38°C

Shelf Life

Best before 18 months from the date of manufacture

ECOGOLD™

Ensures growth and colouration

Ecogold™ is a mix of beneficial bacteria and *Phaffiya rhodozyma* when fed to pet fishes exhibit wide range of benefits, also improves health and colouration.

Ecogold™

- Ensures growth
- Enhances survival
- Supports breeding
- Develops colourful pigmentation
- Helps the fish acclimatize and therefore live longer
- Reduces the formation of harmful bacteria in the aquaria

Composition per 20 mgs

<i>Streptococcus faecalis</i>	T-110™	-	50 mg (2 x 10 ¹⁰)
<i>Bacillus mesentericus</i>	TO-A™	-	50 mg (2 x 10 ⁶)
<i>Clostridium butyricum</i>	TO-A™	-	20 mg (1 x 10 ⁹)
<i>Phaffiya rhodozyma</i>		-	200 mg
Maize starch		-	10 mg
Excipients		-	q.s.

Ecogold™ is blend of beneficial bacteria used in aquaculture as animal feed supplement

Direction for use :

0.5 gm per kg body weight of the pet fish daily.

Physical features

Appearance - Free flowing powder with fermented odour

Tolerance

Temperature range : Min 10 - Max 60° C

P^H range : Min 4 - Max 10

Storage Precautions

Store in a cool dry place.

Keep the bottle tightly closed after every usage

Shelf life

Best before 18 months from the date of manufacture

Store in a dry place under 38° C

Minogold™

Essential ergogenic aminoacids
for pet fish

Minogold™ compensates the indispensable amino acids that ornamental fish cannot either synthesize at all or at a rate commensurate with its need for protein disposition for a variety of metabolic activities.

In fish, amino acid deficiency is manifested by poor growth rate with poor weight gain and poor feed intake. The natural phyto nutrients available is found to increase pigmentation in ornamental fishes and the survival in larval stages while breeding angel fish, fighter, gourami, gold fish etc

Direction for use

3-5 gms of **Minogold™** is to be mixed along with the feed and served once daily

Composition per 5 g

L-Glutamine	325 mg
L-Arginine HCl	305 mg
L-Lysine HCl	305 mg
L-Leucine	270 mg
L-Isoleucine	215 mg
L-Valine	180 mg
L-Proline	70 mg
L-Threonine	70 mg
L-Methionine	35 mg
L-Histidine HCl H ₂ O	25 mg
Maltitol	2.93 gm
Excipients	q.s

Storage Precautions

Keep the bottle tightly closed during usage

Store in a dry place under 38°C
